This document was last updated on 1st January 2023.

You are about to purchase a product that is not simple and may be difficult to understand.

What is this product ?

Type : The Product was incorporated as a Luxembourg fonds d'investissement (open-ended investment company) established as a société d'investissement à capital variable (investment company with variable capital).

Period:

This SICAV was created for a period of 99 years.

Investment Objective:

To provide investors with long term capital appreciation by investing primarily in Greek equity securities and secondarily in other securities.

Portfolio Securities : The Sub-Fund invests, in a percentage of at least 65% of its net assets, in equity securities and other equivalent securities of companies admitted and dealt in the Athens Stock Exchange and companies which are established in Greece but admitted to any other official listing or dealt in other regulated market as well as companies with significant operations or carrying out a sizeable part of their business activities in Greece.

Secondarily, and up to an aggregated percentage of 35% of its net assets, the Sub-Fund may also invest in global equity securities and other equivalent securities of companies admitted to any other official listing or dealt in on any other regulated market (ADRs, GDRs), fixed income securities and structured financial instruments (included and limited to convertible bonds up to 10% of its net assets and contingent convertibles up to 10% of its net assets), money market instruments and bank deposits.

Sustainability-related disclosure: The Sub-Fund is categorized under article 6 of SFDR. For further information, please refer to the relevant sections of the prospectus.

Derivatives: The Sub-Fund may invest directly to listed derivative financial instruments, including index, equity, fixed-income, interest and currency futures and options for hedging, efficient portfolio management and investment purposes. At all times, the maximum exposure level to derivatives is capped at 100% of the Sub-Fund net assets.

Benchmark:

- Athens Stock Market's General Index.

Other Information:

- Recommendation:

The recommended investment period is five years minimum

Intended retail investors:

The Sub-Fund targets informed investors who are advised to invest only part of their assets therein.

What are the risks and what could I get in return ?

Summary Risk Indicator (SRI) :

The Summary Risk Indicator (SRI) makes it possible to assess the level of risk of this product in relation to others. It indicates the likelihood that this product will incur losses in the event of market movements. The risk indicator assumes that you will keep the product for 5 years. This product has been categorized into risk class 5 out of 7, which is a medium-high risk class. The risk category associated with this Sub-Fund is likely to change over time.

The lowest category does not mean risk-free investment. The Sub-Fund may also be exposed to the following risks that are not adequately addressed by the above risk indicator:

- Counterparty risk
- Liquidity risk
- Credit risk
- Derivatives risk.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 5 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. The stress scenario shows what you might get back in extreme market circumstances. This product cannot be easily cashed in. If you exit the investment earlier than the recommended holding period, you may have to pay extra costs.

Recommended holding period: 5 years Example Investment: 10 000 €		If you exit after 1 year	If you exit after 5 years
Minimum	There is no guaranteed return no matter when you exit		
Stress	What you might get back after costs	1 157.59 €	770.61 €
	Average return each year	-88.61%	-40.31%
Unfavourable <i>This type of scenario occurred for an investment between 31.12.2012 and 31.12.2022</i>	What you might get back after costs	5 141.57 €	4 990.50 €
	Average return each year	-49.44%	-13.27%
Moderate <i>This type of scenario occurred for an investment between 31.12.2012 and 31.12.2022</i>	What you might get back after costs	9 756.18 €	8 553.71 €
	Average return each year	-4.07%	-3.40%
Favourable <i>This type of scenario occurred for an investment between 31.12.2012 and 31.12.2022</i>	What you might get back after costs	15 603.35 €	17 664.06 €
	Average return each year	53.41%	11.67%

What happens if the Issuer is unable to pay out ?

Losses are not covered by an investor compensation or guarantee scheme. If BEDROCK ASSET MANAGEMENT UK is unable to pay out, the Investor may not recover the sums invested and the Investor may therefore face a financial loss, and will not be able to make a claim to the CSSF.

What are the costs?

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- EUR 10 000 is invested

COSTS OVER TIME

	If you exit after 1 year	If you exit after 5 years
Total costs	832.53 €	1782.22 €
Impact on return (RIY) per year (*)	8.40%	3.66%

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 0.26% before costs and -3.40% after costs. We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

COMPOSITION OF COSTS

The table below shows:

- ♦ the impact of the different types of costs on the investment return you might get at the end of the recommended holding period;
- ♦ the meaning of the different cost categories

One-off costs upon entry or exit	Annual cost impact if you exit after 5 years.	
Entry costs	% of the amount you pay in when entering this investment	Up to 3.00%
Exit costs	% of your investment before it is paid out to you	Up to 3.00%
Ongoing costs		
Management fees and other administrative or operating costs	% of the value of your investment per year. This is an estimate based on actual costs over the last year.	1.28%
Transaction costs	% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell.	0.43%
Incidental costs taken under specific conditions		
Performance fees	15% on the average daily net assets as defined on the prospectus. The actual amount will vary depending on how well your investment performs. The aggregated cost estimation above includes the average over the last 5 years.	0.78%

How long should I hold it and can I take my money out early ?
