

# TRITON Growth Greek Equity

## Mutual Fund

Monthly Summary Report: 31 December 2023

### Summary Risk Indicator

The risk indicator is based on the assumption that you will hold the product for the recommended period of 5 years.

### Investment Objective

TRITON Growth Greek Equity Fund is an open-end Mutual Fund incorporated in Greece. The Fund's objective is to provide investors with long term capital appreciation by investing mainly in stocks listed in the Athens Stock Exchange. The Fund is actively managed relative to the benchmark.

### Investment Strategy

The Fund actively invests in companies listed in the Athens Stock Exchange that demonstrate long term growth prospects and satisfy the fundamental criteria of our bottom-up analysis. Additionally, the Fund seeks opportunities from short-term market trends.

### Quarterly Commentary

After 13 years, Greece regained the investment grade, following a series of revised credit rating agency reports. It was named country of the year by the Economist and returned to producing primary surpluses. The profitability of the companies remains stable and in many cases improves significantly, being the driving force of the market. Despite the significant performance of 2023 +39.08%, the Greek market remains attractive as it trades at 7.8 times (P/E) 2024 projected earnings. The banking sector had a return of +65.7% in 2023 in expectation of the privatizations by the HFSF and the first dividend distribution in 12 years. The General Index had a positive return of +39.08% for 2023, while Triton Growth Greek Equity recorded a return of +43.55%, outperforming the index by 4.48 percentage points.

## Key risks

The Mutual Fund is subject to Investment risks and Other associated risks from the techniques and securities it uses to achieve its objective. The table on the right explains how these risks relate to each other and the Outcomes to the Unitholder that could affect an investment in the Mutual Fund.

Investors should also read Risk Descriptions in the Prospectus for a full description of each risk.

## Investment risks

Risks from the Sub-Fund's techniques and securities

Market	Liquidity	Derivatives (Leverage)	Single Region/Country Risk:
The fund is subject to normal market fluctuations and the risks associated with investing in securities markets. The value of your investment and the income from it may be affected by general economic and political factors as well as industry or company specific factors.	The fund operates in a market characterized by low trade volumes and securities that may become illiquid. This results in a higher risk of losses due to reduced trading speed/efficiency and sharper price fluctuations.	The derivatives market introduces significant levels of complexity, increasing the probability of adverse gains or losses to the fund that holds derivatives. The higher sensitivity to price movements of the underlying asset can asymmetrically affect the price of a derivative that is linked to it.	As the Fund is a specialized country-specific or geographical regional fund, the investment bears more risk than a more globally diversified portfolio.
