

# TRITON Global Equity International Mutual Fund

Monthly Summary Report: 31 March 2024

## Summary Risk Indicator

Lower Risk ← Higher Risk

The risk indicator is based on the assumption that you will hold the product for the recommended period of 5 years.

## Investment Objective

The Fund investment objective is to provide the unit holder with capital growth, by investing mainly in large-cap companies in both developed and emerging markets. The Fund is actively managed relative to the Benchmark and its purpose is to provide investors with long-term capital growth.

## Investment Strategy

The Fund invests mainly in large-cap companies in both developed and emerging markets which in the Management Company's view present attractive valuations or opportunities to increase profits or market shares in the sectors in which they operate. The Fund may also acquire equity securities through certificates of deposit (ADRs, GDRs). The Fund's investment policy does not follow specific geographical or sectoral restrictions. The selection of these stocks is based on a variety of criteria regarding the fundamentals of the selected company, the earnings growth prospects, the quality and effectiveness of management teams and market valuation.

## Q1 Commentary

Global stock markets registered strong gains in Q1 amid a resilient US economy and ongoing enthusiasm around Artificial Intelligence. Expectations of interest rate cuts also boosted shares although the pace of cuts is likely to be slower than the market had hoped for at the turn of the year. Bonds saw negative returns in the quarter. Global economic activity was on the upswing. The US economy continued to outperform, buoyed by sustained consumer spending, thanks to rising real wages amidst easing inflation. US shares registered a robust advance in the quarter. Gains were supported by some well-received corporate earnings as well as ongoing expectations of rate cuts later this year. The Federal Reserve (Fed) kept interest rates on hold at 5.25 - 5.5%. US inflation ticked up slightly to 2.5% year-on-year in February. Fed chair Jerome Powell said that the central bank will be "careful" about the decision on when to cut rates. Annualised GDP growth for Q4 was revised up in the third estimate to 3.4%. Nonfarm payrolls were robust although the unemployment rate rose in February. The ISM manufacturing PMI signalled expansion after 16 straight months of contraction, rising to 50.3 in March. Triton Global Equity recorded a return of 12.95% in Q1 2024 overperforming the relevant index by 2.87%.

### Key risks

The Mutual Fund is subject to Investment risks and Other associated risks from the techniques and securities it uses to to achieve its objective. The table on the right explains how these risks relate to each other and the Outcomes to the Unitholder that could affect an investment in the Mutual Fund.

Investors should also read Risk Descriptions in the Prospectus for a full description of each risk.

### Investment risks

Risks from the Sub-Fund's techniques and securities

Market	Credit	Derivatives (Leverage)	Currency
The fund is subject to normal market fluctuations and the risks associated with investing in securities markets. The value of your investment and the income from it may be affected by general economic and political factors as well as industry or company specific factors.	Exchange rate fluctuations may negatively impact the value of investments designated in another currency. Adverse movements in currency exchange rates could result in a decrease in return and a loss of capital. It may not be possible to successfully hedge against the currency risk exposure in all circumstances.	The derivatives market introduces significant levels of complexity, increasing the probability of adverse gains or losses to the fund that holds derivatives. The higher sensitivity to price movements of the underlying asset can asymmetrically affect the price of a derivative that is linked to it.	Exchange rate fluctuations may negatively impact the value of investments designated in another currency. Adverse movements in currency exchange rates could result in a decrease in return and a loss of capital. It may not be possible to successfully hedge against the currency risk exposure in all circumstances.
