

PERFORMANCE SCENARIOS

April 2026 - Data from 31/03/2026

The data below include all costs of the product itself. The data do not take into account your personal tax situation, which can also affect the amount that will be returned to you. What you will receive from this product depends on future market performances. Future market developments are uncertain and cannot be accurately predicted. The adverse, moderate, and favorable scenarios presented are examples using the worst, average, and best performance of the product over the last 10 years. The scenarios presented are examples that are based on past results. Markets could evolve very differently in the future. The extreme conditions scenario shows what you could gain in extreme market conditions.

The tables below show the money you could get back over the next 1 and 5 years, in different scenarios, provided you invest 10,000 euros. The scenarios presented show how your investment could perform. You can compare with scenarios of other products. The scenarios presented are an estimate of future performance based on a conservative best estimate of the expected values of the product. Returns vary depending on market performance and the investment holding period.

TRITON BALANCED FUND (GRF000090008)

Investment:10,000 EUR		In case of early departure 1 year	In case of early departure 3 years
